# TWIST

THE MOST COMFORTABLE  
MICRONEEDLING EXPERIENCE

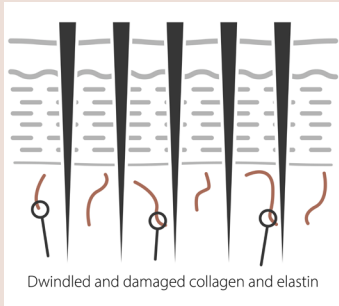

Redefining the Gold Standard in Microneedling with The Original Dermaroller®

Inventors of microneedling and collagen induction therapy for aesthetic applications.

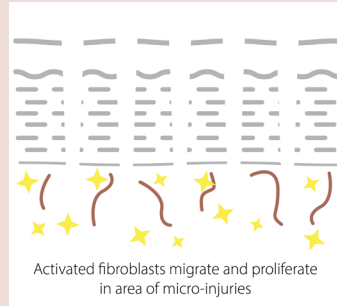

# How The TWIST Treatment Works

## 1. Treatment

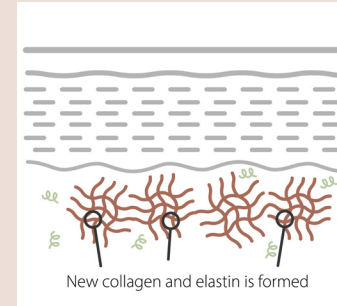

During treatment, surgical-grade, non-traumatic microneedles perforate the skin rapidly and precisely, creating on average more than a million micro-channels per treatment that stimulate the skin's natural non-emergency healing response.

## 2. Corrective Healing

Controlled damage instructs the skin to heal slowly and correctively. Activated fibroblasts proliferate in the area to fill the wounds with new deposits of collagen & elastin without developing any scars. At the same time, the micro-wounds are drenched with corrective hydrating ingredients that expedite healing and improve end results.

## 3. Healthier Skin

After healing, the affected skin is completely renewed with improved structure, firmness and elasticity. Cellular functions are restored and skin cells are reset to their healthy mode of operation, leaving you with healthier and better looking skin.

## Technology Designed For You

The TWIST system is equipped with revolutionary microneedling technologies that provide the best protection for your skin and delivers exceptional results with unparalleled comfort.

### BENEFITS

- 1 Lowest possible risk of side effects and complications
- 2 Unmatched comfort during treatment. You will barely feel it!
- 3 Precise micro-perforations that will not over-stress your skin
- 4 Faster healing with truly minimal downtime
- 5 More visible results that last longer

## Everything You Need To Know About The TWIST Microneedling Experience

### HOW LONG DO TREATMENTS TAKE?

The treatment takes 20-60 minutes depending on the size of the area treated.

### HOW MANY TREATMENTS WILL I NEED?

Number of treatments may vary according to your initial skin condition, age, response to treatment and other individual factors. For most people, 3-4 treatments are usually required.

### WHEN WILL I SEE RESULTS?

Results are individual and may vary between people. The effect of microneedling is cumulative, and visible changes to the skin develop over time. For most people, the results will be most visible 1-3 months after the last treatment.

### IS THERE ANY DOWNTIME?

Downtime is minimal and you can expect to resume your daily routine within 24 hours. After treatment, your skin is expected to be reddish and sensitive to touch. This usually resolves within 24-48 hours.

### IS THE TREATMENT PAINFUL?

TWIST offers the most comfortable microneedling experience. The treatment feels like gentle pinching and is not painful. If you have sensitive skin, topical numbing cream could be applied before treatment.

### HOW LONG DO RESULTS LAST?

TWIST treatments provide long-term benefits for your skin that could last for many months to come. Periodic touch-up treatments might be needed to maintain your results. Using appropriate skincare on a daily basis and avoiding sun exposure will also help to prolong the therapeutic effect.
